This document contains amendments to the Guidelines Manual effective November 1, 2012, November 1, 2013, November 1, 2014, November 1, 2015, August 1, 2016, and November 1, 2016.

the Commission's intent when it promulgated §2X5.2, as stated in Amendment 685 (effective November 1, 2006), that the Commission will reference new Class A misdemeanor offenses either to §2X5.2 or to another, more specific Chapter Two guideline, if appropriate. The Commission determined that with a base offense level of 6, §2X5.2 covers the range of sentencing possibilities that are available for defendants convicted of this offense, regardless of their criminal history. The Commission may consider referencing section 1597 to another substantive guideline in the future after more information becomes available regarding the type of conduct that constitutes the typical violation and the aggravating or mitigating factors that may apply.

Finally, the amendment removes from Appendix A the guideline references for two jurisdictional statutes in title 18 related to crimes committed within Indian country. Section 1152, also known as the General Crimes Act, grants federal jurisdiction for federal offenses committed by non-Indians within Indian country. Section 1153, also known as the Major Crimes Act, grants federal jurisdiction over Indians who commit certain enumerated offenses within Indian country. The Act expanded section 1153 to include any felony assault under section 113. Because sections 1152 and 1153 are simply jurisdictional statutes that do not provide substantive offenses, the Commission determined there is no need for Appendix A to provide a guidelines reference for those statutes.

Effective Date: The effective date of this amendment is November 1, 2014.

REASON FOR AMENDMENT: This amendment revises the guidelines applicable to drug trafficking offenses by changing how the base offense levels in the Drug Quantity Table in §2D1.1 (Unlawful Manufacturing, Importing, Exporting or Trafficking (Including Possession with Intent to Commit These Offenses); Attempt or Conspiracy) incorporate the statutory mandatory minimum penalties for such offenses.

When Congress passed the Anti-Drug Abuse Act of 1986, Pub. L. 99–570, the Commission responded by generally incorporating the statutory mandatory minimum sentences into the guidelines and extrapolating upward and downward to set guideline sentencing ranges for all drug quantities. The quantity thresholds in the Drug Quantity Table were set so as to provide base offense levels corresponding to guideline ranges that were slightly above the statutory mandatory minimum penalties. Accordingly, offenses involving drug quantities that trigger a five-year statutory minimum were assigned a base offense level (level 26) corresponding to a sentencing guideline range of 63 to 78 months for a defendant in Criminal History Category I (a guideline range that exceeds the five-year statutory minimum for such offenses by at least three months). Similarly, offenses that trigger a ten-year statutory minimum were assigned a base offense level (level 32) corresponding to a sentencing guideline range of 121 to 151 months for a defendant in Criminal History Category I (a guideline range that exceeds the ten-year statutory minimum for such offenses by at least one month). The base offense levels for drug quantities above and below the mandatory minimum threshold quantities were extrapolated upward and downward to set guideline sentencing ranges for all drug quantities, see §2D1.1, comment. (backg’d.), with a minimum base offense level of 6 and a maximum base offense level of 38 for most drug types.

This amendment changes how the applicable statutory mandatory minimum penalties are incorporated into the Drug Quantity Table while maintaining consistency with such penalties. See 28 U.S.C. § 994(b)(1) (providing that each sentencing range must be “consistent with all pertinent provisions of title 18, United States Code”); see also 28 U.S.C. § 994(a) (providing that the Commission shall promulgate guidelines and policy statements “consistent with all pertinent provisions of any Federal statute”).

Specifically, the amendment reduces by two levels the offense levels assigned to the quantities that trigger the statutory mandatory minimum penalties, resulting in corresponding guideline ranges that include the mandatory minimum penalties. Accordingly, offenses involving drug quantities that trigger a five-year statutory minimum are assigned a base offense level of 24 (51 to 63 months at Criminal History Category I, which includes the five-year (60 month) statutory minimum for such offenses), and offenses involving drug quantities that trigger a ten-year statutory minimum are assigned a base offense level of 30 (97 to 121 months at Criminal History Category I,

which includes the ten-year (120 month) statutory minimum for such offenses). Offense levels for quantities above and below the mandatory minimum threshold quantities similarly are adjusted downward by two levels, except that the minimum base offense level of 6 and the maximum base offense level of 38 for most drug types is retained, as are previously existing minimum and maximum base offense levels for particular drug types.

The amendment also makes parallel changes to the quantity tables in §2D1.11 (Unlawfully Distributing, Importing, Exporting or Possessing a Listed Chemical; Attempt or Conspiracy), which apply to offenses involving chemical precursors of controlled substances. Section 2D1.11 is generally structured to provide offense levels that are tied to, but less severe than, the base offense levels in §2D1.1 for offenses involving the final product.

In considering this amendment, the Commission held a hearing on March 13, 2014, and heard expert testimony from the Executive Branch, including the Attorney General and the Director of the Federal Bureau of Prisons, defense practitioners, state and local law enforcement, and interested community representatives. The Commission also received substantial written public comment, including from the Federal judiciary, members of Congress, academicians, community organizations, law enforcement groups, and individual members of the public.

The Commission determined that setting the base offense levels slightly above the mandatory minimum penalties is no longer necessary to achieve its stated purpose. Previously, the Commission has stated that “[t]he base offense levels are set at guideline ranges slightly higher than the mandatory minimum levels [levels 26 and 32] to permit some downward adjustment for defendants who plead guilty or otherwise cooperate with authorities.” However, changes in the law and recent experience with similar reductions in base offense levels for crack cocaine offenses indicate that setting the base offense levels above the mandatory minimum penalties is no longer necessary to provide adequate incentives to plead guilty or otherwise cooperate with authorities.

In 1994, after the initial selection of levels 26 and 32, Congress enacted the “safety valve” provision, which applies to certain non-violent drug defendants and allows the court, without a government motion, to impose a sentence below a statutory mandatory minimum penalty if the court finds, among other things, that the defendant “has truthfully provided to the Government all information and evidence the defendant has concerning the offense or offenses that were part of the same course of conduct or of a common scheme or plan.” See 18 U.S.C. § 3553(f). The guidelines incorporate the “safety valve” at §5C1.2 (Limitation on Applicability of Statutory Minimum Sentences in Certain Cases) and, furthermore, provide a 2-level reduction if the defendant meets the “safety valve” criteria. See §2D1.1(b)(16).

These statutory and guideline provisions, which are unrelated to the guideline range’s relationship to the mandatory minimum, provide adequate incentive to plead guilty. Commission data indicate that defendants charged with a mandatory minimum penalty in fact are more likely to plead guilty if they qualify for the “safety valve” than if they do not. In fiscal year 2012, drug trafficking defendants charged with a mandatory minimum penalty had a plea rate of 99.6 percent if they qualified for the “safety valve” and a plea rate of 93.9 percent if they did not.

Recent experience with similar reductions in the base offense levels for crack cocaine offenses indicates that the amendment should not negatively affect the rates at which

Amendment 782

offenders plead guilty or otherwise cooperate with authorities. Similar to this amendment, the Commission in 2007 amended the Drug Quantity Table for cocaine base (“crack” cocaine) so that the quantities that trigger mandatory minimum penalties were assigned base offense levels 24 and 30, rather than 26 and 32. *See* USSG App. C, Amendment 706 (effective November 1, 2007). In 2010, in implementing the emergency directive in section 8 of the Fair Sentencing Act of 2010, Pub. L. 111–220, the Commission moved crack cocaine offenses back to a guideline penalty structure based on levels 26 and 32.

During the period when crack cocaine offenses had a guideline penalty structure based on levels 24 and 30, the overall rates at which crack cocaine defendants pled guilty remained stable. Specifically, in the fiscal year before the 2007 amendment took effect, the plea rate for crack cocaine defendants was 93.1 percent. In the two fiscal years after the 2007 amendment took effect, the plea rates for such defendants were 95.2 percent and 94.0 percent, respectively. For those same fiscal years, the overall rates at which crack cocaine defendants received substantial assistance departures under §5K1.1 (Substantial Assistance to Authorities) were 27.8 percent in the fiscal year before the 2007 amendment took effect and 25.3 percent and 25.6 percent in the two fiscal years after the 2007 amendment took effect. This recent experience indicates that this amendment, which is similar in nature to the 2007 crack cocaine amendment, should not negatively affect the willingness of defendants to plead guilty or otherwise cooperate with authorities. *See* 28 U.S.C. § 991(b) (specifying that sentencing policies are to “reflect, to the extent practicable, advancement in knowledge of human behavior as it relates to the criminal justice process”).

The amendment also reflects the fact that the guidelines now more adequately differentiate among drug trafficking offenders than when the Drug Quantity Table was initially established. Since the initial selection of offense levels 26 and 32, the guidelines have been amended many times — often in response to congressional directives — to provide a greater emphasis on the defendant’s conduct and role in the offense rather than on drug quantity. The version of §2D1.1 in the original 1987 Guidelines Manual contained a single specific offense characteristic: a 2-level enhancement if a firearm or other dangerous weapon was possessed. Section 2D1.1 in effect at the time of this amendment contains fourteen enhancements and three downward adjustments (including the “mitigating role cap” provided in subsection (a)(5)). These numerous adjustments, both increasing and decreasing offense levels based on specific conduct, reduce the need to rely on drug quantity in setting the guideline penalties for drug trafficking offenders as a proxy for culpability, and the amendment permits these adjustments to differentiate among offenders more effectively.

The amendment was also motivated by the significant overcapacity and costs of the Federal Bureau of Prisons. The Sentencing Reform Act directs the Commission to ensure that the sentencing guidelines are “formulated to minimize the likelihood that the Federal prison population will exceed the capacity of the Federal prisons.” *See* 28 U.S.C. § 994(g). Reducing the federal prison population and the costs of incarceration has become an urgent consideration. The Commission observed that the federal prisons are now 32 percent overcapacity, and drug trafficking offenders account for approximately 50 percent of the federal prison population (100,114 of 199,810 inmates as of October 26, 2013, for whom the Commission could determine the offense of conviction). Spending on federal prisons exceeds \$6 billion a year, or more than 25 percent of the entire budget for the Department of Justice. The Commission received testimony from the Department of Justice and others that spending on federal prisons is now crowding out resources available for federal prosecutors and law enforcement, aid to state and

local law enforcement, crime victim services, and crime prevention programs, all of which promote public safety.

In response to these concerns, the Commission considered the amendment an appropriate step toward alleviating the overcapacity of the federal prisons. Based on an analysis of the 24,968 offenders sentenced under §2D1.1 in fiscal year 2012, the Commission estimates the amendment will affect the sentences of 17,457 — or 69.9 percent — of drug trafficking offenders sentenced under §2D1.1, and their average sentence will be reduced by 11 months — or 17.7 percent — from 62 months to 51 months. The Commission estimates these sentence reductions will correspond to a reduction in the federal prison population of approximately 6,500 inmates within five years after its effective date.

The Commission carefully weighed public safety concerns and, based on past experience, existing statutory and guideline enhancements, and expert testimony, concluded that the amendment should not jeopardize public safety. In particular, the Commission was informed by its studies that compared the recidivism rates for offenders who were released early as a result of retroactive application of the Commission’s 2007 crack cocaine amendment with a control group of offenders who served their full terms of imprisonment. See USSG App. C, Amendment 713 (effective March 3, 2008). The Commission detected no statistically significant difference in the rates of recidivism for the two groups of offenders after two years, and again after five years. This study suggests that modest reductions in drug penalties such as those provided by the amendment will not increase the risk of recidivism.

Furthermore, existing statutory enhancements, such as those available under 18 U.S.C. § 924(c), and guideline enhancements for offenders who possess firearms, use violence, have an aggravating role in the offense, or are repeat or career offenders, ensure that the most dangerous or serious offenders will continue to receive appropriately severe sentences. In addition, the Drug Quantity Table as amended still provides a base offense level of 38 for offenders who traffic the greatest quantities of most drug types and, therefore, sentences for these offenders will not be reduced. Similarly, the Drug Quantity Table as amended maintains minimum base offense levels that preclude sentences of straight probation for drug trafficking offenders with small quantities of most drug types.

Finally, the Commission relied on testimony from the Department of Justice that the amendment would not undermine public safety or law enforcement initiatives. To the contrary, the Commission received testimony from several stakeholders that the amendment would permit resources otherwise dedicated to housing prisoners to be used to reduce overcrowding, enhance programming designed to reduce the risk of recidivism, and to increase law enforcement and crime prevention efforts, thereby enhancing public safety.

Effective Date: The effective date of this amendment is November 1, 2014.
